Investment Series Defensive Fund

As at 30 June 2024

Investment Objective and Strategy

The Defensive Fund is suited to investors who seek modest returns on average over the short to medium term, allowing for some shorter-term ups and downs. We aim to achieve this by investing primarily in income assets, while including some growth assets.

Risk Indicator

The Risk Indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets go up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way. See the Product Disclosure Statement for more information about the risks associated with investing, and how the risk indicator is calculated.

¹ All performance figures prior to 1 June 2015 are based on the equivalent Managed Investment Account model portfolio profile managed by Booster. Returns quoted after tax at 28% are after tax of 33% up to 31/3/08, 30% from 1/4/08 to 30/09/10 and 28% after 1/10/10. Past performance is not an indicator of future performance.

² Expected returns are calculated based on long-run expectations for investment markets and fund performance, and are not a guarantee of future results. The calculation takes information on how market returns have varied in the past and gives a range of what is assessed to be likely in the future. The ranges of expected returns have been calculated using a statistical tool of 2 ½ standard deviations of return volatility – this means that actual returns are expected to fall outside these ranges 1 year out of every 100. While these ranges may be used as a guide, due to the uncertainty inherent in financial markets they are also not guaranteed.
