

Investment Series

Income 99 Fund

As at 30 June 2024

Investment Objective and Strategy

The Income 99 Fund is suited to investors who seek potentially higher income-driven returns on average over long-term periods (ten years plus), whilst allowing for short to medium term ups and downs. We aim to achieve this by investing predominantly in relatively high dividend-paying growth assets, predominantly listed or issued in New Zealand. The Fund is intended as a higher risk fund, designed to complement a broader portfolio.

Benchmark Asset Allocation

Growth Assets **99%** Income Assets **1%**

Indicative Historical Returns¹

Risk Indicator

The Risk Indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets go up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way. See the Product Disclosure Statement for more information about the risks associated with investing, and how the risk indicator is calculated.

¹ All performance figures prior to 1 November 2016 are based on the equivalent Managed Investment Account model portfolio profile managed by Booster. Returns quoted after tax at 28% are after tax of 33% up to 31/3/08, 30% from 1/4/08 to 30/09/10 and 28% after 1/10/10. Indicative Historical Returns graph is after fees and tax (19.5% to 30/09/2010, and 17.5% from 01/10/2010). Past performance is not an indicator of future performance.

² Expected returns are calculated based on long-run expectations for investment markets and fund performance, and are not a guarantee of future results. The calculation takes information on how market returns have varied in the past and gives a range of what is assessed to be likely in the future. The ranges of expected returns have been calculated using a statistical tool of 2 ½ standard deviations of return volatility – this means that actual returns are expected to fall outside these ranges 1 year out of every 100. While these ranges may be used as a guide, due to the uncertainty inherent in financial markets they are also not guaranteed.
