

#### **Investment Objective and Strategy**

The Corporate Bond Fund is suited to investors who seek an enhanced return to bank term deposits on average over medium term periods, whilst accepting a different risk and allowing for some short term movements up and down. We aim to achieve this by investing entirely in income assets, such as corporate bonds or other fixed interest securities issued by New Zealand and Global companies.

#### **Risk Indicator**

The Risk Indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets go up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way. See the Product Disclosure Statement for more information about the risks associated with investing, and how the risk indicator is calculated.

# <sup>1</sup> All performance figures prior to 1 June 2015 are based on the equivalent Managed Investment Account model portfolio profile managed by Booster. Returns quoted after tax at 28% are after tax of 33% up to 31/3/08, 30% from 1/4/08 to 30/09/10 and 28% after 1/10/10. Indicative Historical Returns graph is after fees and tax (19.5% to 30/09/2010, and 17.5% from 01/10/2010). Past performance is not an indicator of future performance.

<sup>2</sup> Expected returns are calculated based on long-run expectations for investment markets and fund performance, and are not a guarantee of future results. The calculation takes information on how market returns have varied in the past and gives a range of what is assessed to be likely in the future. The ranges of expected returns have been calculated using a statistical tool of 2 ½ standard deviations of return volatility – this means that actual returns are expected to fall outside these ranges 1 year out of every 100. While these ranges may be used as a guide, due to the uncertainty inherent in financial markets they are also not guaranteed.

<sup>3</sup> Asset class weighting is the current target, assets listed within this asset class are actual underlying holdings.

<sup>4</sup> External Ratings are Standard & Poor's (S&P), Fitch's, or Moody's ratings. Ratings of 'A-1+' for NZ Cash, and 'A-2' for commercial paper investments held by the portfolio, reflect S&P's short-term rating scale that applies to these investments. A company with a short-term rating of 'A-2' would generally be consistent with having a long-term rating of 'BBB' or better.

<sup>5</sup> The Secured Loan to Booster KiwiSaver Scheme Geared Growth Fund (a related party) and the AAM Diversified Loan Fund, are not independently rated, but Booster Investment Management Limited considers the credit rating of these securities to be equivalent of a Standard & Poor's (S&P) rating of "A" and "BB" respectively. BondWatch, Booster's credit review process, is used to review the remaining securities not independently rated. The BondWatch rating is the result of our internal analysis of a company's financials, governance structure, and business outlook measured against sector-specific metrics. We consider both quantitative and qualitative aspects of the business to ensure our BondWatch rating reflects both the current standing and stability of that credit profile going forward. The BondWatch rating scale from G1 (highest) to G8 (lowest). A rating of Bis the minimum level for a security to be included in the portfolio - which we consider equivalent to a S&P rating of BB. More information can be from G1 https://booster.co.nz/bondwatchsummary.aspx.
