¹ All performance figures prior to 1 June 2015 are based on the equivalent Managed Investment Account model portfolio profile managed by Booster. Returns quoted after tax at 28% are after tax of 33% up to 31/3/08, 30% from 1/4/08 to 30/09/10 and 28% after 1/10/10. Past performance is not an indicator of future performance.

² Expected returns are calculated based on long-run expectations for investment markets and fund performance, and are not a guarantee of future results. The calculation takes information on how market returns have varied in the past and gives a range of what is assessed to be likely in the future. The ranges of expected returns have been calculated using a statistical tool of 2 ½ standard deviations of return volatility – this means that actual returns are expected to fall outside these ranges 1 year out of every 100. While these ranges may be used as a guide, due to the uncertainty inherent in financial markets they are also not guaranteed.
