What are the risks of investing?

Risk indicator for the **Wealth Growth Fund**¹:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets go up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://www.sorted.org.nz/tools/investor-kickstarter>

Note that even the lowest category does not mean a risk-free investment, and there are other risks not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on returns data for the five years to 31 March 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

Notes

1 Because the fund started 7 March 2025, the risk indicator has been calculated using market index returns (rather than the funds' actual returns) for the 5 year period to 31 March 2025. As a result, the risk indicator may provide a less reliable indication of the potential future volatility of the fund.

2 Because the fund started 7 March 2025, the past year annual return after deductions for charges and tax, and the annual return after deductions for charges but before tax are not available.
