### Description of this fund

The Income 50 Fund is suited to investors who seek a medium level of income-driven returns on average over medium term periods (five years plus), allowing for shorter-term ups and downs. We aim to achieve this by investing in a mix of income assets (with a focus on corporate credit) and relatively high dividend-paying growth assets, predominantly listed or issued in New Zealand. The Fund is intended as a medium risk fund, designed to complement a broader portfolio.

### What are the risks of investing?

Risk indicator for the **Income 50 Fund:**

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets go up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at https://www.sorted.org.nz/tools/investor-kickstarter

Note that even the lowest category does not mean a risk-free investment, and there are other risks not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on returns data for the five years to 30 September 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.
