

Booster KiwiSaver Scheme Geared Growth Fund

As at 30 June 2024

Investment Objective and Strategy

The Geared Growth Fund is suited to investors who seek higher returns, including increased potential returns via leverage, on average over extended periods (fifteen years plus), allowing for more significant short to medium term ups and downs. We aim to achieve this by investing predominantly in growth assets, with little or no allocation to income assets, and the use of leverage to provide increased exposure.

Target Gearing Ratio **35%**

Benchmark Asset Allocation

Growth Assets **99%** Income Assets **1%**

About the Geared Growth Fund

The Geared Growth Fund is designed to enable long-term savers to gain the benefits of a leveraged (or geared) exposure to growth assets (e.g. shares). The Geared Growth Fund increases the effective size of your invested funds by purchasing additional investments. This magnifies the returns for the investor, both up and down.

This is best illustrated through a hypothetical example. Using the Geared Growth Fund's target gearing ratio of 35% and if the underlying investments were to increase by 10%, an investor in the Geared Growth Fund would receive a 13.5% return. While if the underlying investments were to fall by 10%, the balance of an investor in the Geared Growth would fall by 13.5%.

Risk Indicator

The Risk Indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets go up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way. See the Product Disclosure Statement for more information about the risks associated with investing, and how the risk indicator is calculated.

Key Facts

Fund Size	\$487.3 million
Inception Date	15/07/2009
Manager	Booster Investment Management Limited
Supervisor	Public Trust
Fund Type	Portfolio Investment Entity (PIE)
Suggested Investment Timeframe	15 years +

Historical Returns¹

Note: This scenario is an illustration only and is calculated before fees. It assumes income returns offset the interest costs associated with borrowing funds to invest, on an after tax basis.

Performance as at 30-Jun-2024¹

	Before Tax	After Tax at 28%
Last month	2.5%	2.3%
Last 3 months	1.1%	0.9%
Last 6 months	12.2%	11.1%
Last 12 months	16.6%	14.8%
Last 2 years (p.a.)	15.7%	14.3%
Last 3 years (p.a.)	4.4%	3.4%
Last 5 years (p.a.)	9.9%	8.8%
Last 10 years (p.a.)	11.1%	10.0%
Since Inception (15/07/2009) (p.a.)	10.1%	9.0%

All figures are after fees. Please see the Product Disclosure Statement for further details.

Fund Characteristics²

The range of expected returns for the fund is shown below. This shows how returns on the fund are likely to vary more in the short term, but converge in a narrower range over the longer term.

	PIR			
	0%	10.5%	17.5%	28%
Expected Long Term Return Forecast (p.a. after fees)	9.8%	9.3%	9.0%	8.6%
Range of expected returns in any one year (p.a. after fees)	-24% to 54%	-24% to 54%	-24% to 53%	-25% to 53%
Range of expected returns in any ten years (p.a. after fees)	-3% to 21%	-4% to 21%	-4% to 21%	-4% to 20%

¹ Returns at 28% PIR quoted are after tax of 30% up to 30/09/10 and 28% after 1/10/10. Past performance is not an indicator of future performance.

² Expected returns are calculated based on long-run expectations for investment markets and fund performance, and are not a guarantee of future results. The calculation takes information on how market returns have varied in the past and gives a range of what is assessed to be likely in the future. The ranges of expected returns have been calculated using a statistical tool of 2 ½ standard deviations of return volatility – this means that actual returns are expected to fall outside these ranges 1 year out of every 100. While these ranges may be used as a guide, due to the uncertainty inherent in financial markets they are also not guaranteed.
