

# Booster KiwiSaver Scheme Capital Guaranteed Fund

As at 29 February 2024

## Investment Objective and Strategy

The Capital Guaranteed Fund is suited to investors who seek relatively modest returns allowing for some shorter-term ups and downs, supported by a capital guarantee. We aim to achieve this by investing primarily in income assets, while including some growth assets.

## Risk Indicator

The Risk Indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets go up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way. See the Product Disclosure Statement for more information about the risks associated with investing, and how the risk indicator is calculated.

<sup>1</sup> On 19 November 2014 members of the Fidelity KiwiSaver Scheme in the equivalent Fidelity KiwiSaver Scheme funds were transferred to this fund. Therefore returns prior to 1 July 2014 have been calculated by splicing together the returns from the fund established on 1 July 2014 with those of the equivalent fund in the Fidelity KiwiSaver Scheme.

Returns at 28% PIR quoted are after tax of 33% up to 31/3/08, 30% from 1/4/08 to 30/09/10, and 28% from 1/10/10, and after fees. Past performance is not an indicator of future performance.

<sup>2</sup> Expected returns are calculated based on long-run expectations for investment markets and fund performance, and are not a guarantee of future results. The calculation takes information on how market returns have varied in the past and gives a range of what is assessed to be likely in the future. The ranges of expected returns have been calculated using a statistical tool of 2 ½ standard deviations of return volatility – this means that actual returns are expected to fall outside these ranges 1 year out of every 100. While these ranges may be used as a guide, due to the uncertainty inherent in financial markets they are also not guaranteed.
