## Booster KiwiSaver Scheme Moderate Fund

As at 30 April 2024

### **Investment Objective and Strategy**

The Moderate Fund is suited to investors who seek moderate returns on average over medium term periods (three years plus), allowing for some shorter-term ups and downs. We aim to achieve this by investing mainly in income assets, while including a moderate allocation of growth assets.

#### **Risk Indicator**

The Risk Indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets go up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way. See the Product Disclosure Statement for more information about the risks associated with investing, and how the risk indicator is calculated.

Past performance is not an indicator of future performance. <sup>2</sup> Expected returns are calculated based on long-run expectations for investment markets and fund performance, and are not a guarantee of future results. The calculation takes information on how market returns have varied in the past and gives a range of what is assessed to be likely in the future. The ranges of expected returns have been calculated using a statistical tool of 2 ½ standard deviations of return volatility – this means that actual returns are expected to fall outside these ranges 1 year out of every 100. While these ranges may be used as a guide, due to the uncertainty inherent in financial markets they are also not guaranteed.
